A Message from the President

The year of 2015, the 5th year of the 12th National Five-Year Plan, witnessed great achievements and accomplishments made thanks to the staff's arduous efforts at Children's Hospital of Fudan University. As required by our Three-Year Action Plan to Improve the Environment of Medical Practice, we have made significant progresses in the construction of standardization, specialization, informatization and internationalization so that Children's Hospital has been ranked top in the list of Chinese hospitals of scientific and technical influence, after topping the counterparts in the ranking list of the best Chinese specialized hospitals and of the best clinical disciplines, respectively.

In medical practice, we received more than 2,280,000 outpatients and emergency patients, performed 19,000 surgeries on hospitalized patients and discharged 39,000 patients. Thanks to the vigorous construction of 7 state clinical disciplines and the significantly strengthened medical services, the number of sick children to seek medical advice here at Children's Hospital has been keeping growing.

We have established Pediatric Development Coalition as an advanced platform for further development and homogenization, for 13 alliances. We have formed cooperative relationships with 29 medical institutions and collaborating networks with over 60 hospitals across the country. Additionally, we have signed cooperation agreements with 22 children's medical centers in the world, pushing Children's Hospital to the forefront of global pediatrics.

As to scientific research, a total number of 54 projects have been in operation, and of 380, published, of which 146 were accepted by SCI journals. In medical education, the project of Teaching Model Construction of MOOC Pediatrics with Flipped Classroom and PBL pedagogy has been authorized as one of the nationally planned MOOC programs. And also "1125" Construction Project of Talented Persons has turned out 6 advanced interdisciplinary teams.

We have been proud of the assisting medical workers such as Dr. GONG Hairong who joined the 2nd batch of Red Cross medical rescue workers to the earthquake-stricken area of Nepal, and Dr. WANG Laishuan who worked at Kashgar Second People's Hospital for one year and a half. They have been well recognized and appraised for their professionalism.

In the past year, we have spared no effort to pursuit our common goals and ideals. Few would deny the fact that what we did, individually and collectively, has shaped Children's Hospital today.

With 2016 approaching, the 1st year of the 13th National Five-Year Plan, we will still carry a down-to-earth attitude and strong confidence in striving for further achievements and accomplishments.

The building of the CPC members has been embodied by CPC member charity activities, CPC member theme activities and Party and Youth League member joint activities with a view to promoting work ethics and physician professionalism.

As one of these meaningful programs, our Three-Year Action Plan to Improve the Environment of Medical Practice has been well recognized as an outstanding program in terms of patient-physician rapport and humanistic medicine in Shanghai medical community. Moreover, the project of Window for Complaints, which so far has received 209 suggestions and proposals, has been awarded Wonderful Service Brand by Shanghai Health and Family Planning Commission.

As to the construction of hospital culture, we have carried out a series of meaningful activities at Children's Hospital, such as New Mom and Dad Saloon, Spring Festival Get-together, One-day Tour, Family Movie Day, etc. Thanks to the activities, a great deal of harmony has been nurtured among the staff, which to a great extent has facilitated the successful accomplishment and implementation of the duties and tasks assigned.

As responsible citizens, we have been actively engaged in off-hospital social work, as indicated by the participation in the construction of Minhang District of Shanghai into a nationally civilized area.

Without arduous efforts, we would not have made such achievements and accomplishments in 2015. With a vision of Children's Hospital for 2016, we will continue to spare no effort to build the CPC members in promoting Children's Hospital towards a top pediatric medical center in Asia.
